CSPADT-0326-964

CSP ABU DHABI TERMINAL - OPERATIONAL UPDATE 2

Acceptance & Storage of DG cargo at CSP ADT.

Dear Valued Customers,

Given the current scenario and disruptions in the shipping network, CSP Abu Dhabi Terminal (CSP ADT), Khalifa Port has implemented the following procedures to reduce operational risk when handling Dangerous containers /goods (IMDG cargo). Please note these measures will take **effect immediately from March 9, 2025**.

Import Containers (IMDG):

- **Import units in the yard** - Consignees, clearing agents, and transporters are required to ensure and make the necessary arrangements for the evacuation of all IMDG units from the terminal as soon as possible.
- **For upcoming Import Shipments** – Shipping Line should confirm with customers that these units are immediately evacuated immediately after discharge.

Export Containers (IMDG):

- **Export Units lying in the yard:** Containers currently stored at the terminal/premises must have a confirmed loading vessel. If not, the container(s) should be removed from the terminal yard and returned to customer facilities as soon as possible.
- **Acceptance of new export units:** CSP ADT will only accept IMDG cargo and containers if the channel's traffic status has been officially confirmed as GREEN. Until then, acceptance of all IMDG cargo is suspended until a confirmed loading plan is provided, and only on the same day of the loading.

Transshipment Containers (IMDG)

- **Acceptance of IMDG transshipment at our terminal has been temporarily suspended until further notice. CSPADT will not discharge any IMDG transshipment units, in any circumstances.**

All terminal users are requested to comply strictly with the above directive to ensure operational safety and regulatory adherence.

The safety of our employees, partners, and customers/cargo is our top priority.

Thank you for your understanding and continued cooperation. Should there be any further clarification, please feel free to reach us below:
